

harley axis

a unique patented folding design

The Axis table system has a unique patented hinge design (Patent PCT/GB95/02653). This allows the table frame to fold within its own length for ease of reconfiguration, storage and transportation.

The top is easily attached to the underframe by moulded plastic locating lugs. To extend the system, quadrant shaped corner units are added with a fixed under

frame and are supported by adjacent tables. No tools are required to assemble or disassemble the Axis system. A trolley is available which carries up to six tables. The 1500 x 750 modular design allows all the classic table top shapes giving an almost endless choice of room layouts from boardroom to the extensively used horseshoe layout.

Harley Axis is certified to the following standard:
BS4875 Strength and Stability of Office Furniture
