## function and flexibility

The Harley Standard Collection comprises a series of three distinctive modular table ranges with complementary furniture. Each range is designed to meet a multiplicity of requirements from impromptu meetings to the prestigious conference facility. This is achieved through a wide choice of table shapes, thicknesses, finishes and table support frame designs with flexibility as the major criteria. The collection can be quickly assembled, rearranged, stacked and stored, saving space and time. There is also a range of ancillary presentation furniture and seating designed to enhance the Training, Presentation and Conference environment.

### Flip top tables

Harley flip top tables are designed to pivot through 90° for easy storage or movement during relocation e.g. room-to-room. The steel tubular frames can be black powder coated or chrome plated and are fitted with twin wheel castors.

### Foldaway tables

Harley Foldaway tables are designed to fold and stack flat for convenient storage. Plastic buffers/spacers set beneath the top prevent any wood to wood or metal to wood contact when stacked. The steel tubular frames can be black or silver powder coated or chrome plated and they are fitted with adjustable feet to

compensate for uneven floors.

### Modular tables

4-leg modular tables with 60mm diameter legs can be either finished in matching wood, powder coated or chrome plated. They offer a more traditional aesthetic and are more suited to a conference or boardroom arrangement.
