

# freestyle screens

their use is only limited by  
your imagination

Freestyle screens have been developed to create space division within the open plan office. Freestyle screens are simple to connect and install with no in-line or corner 'creep' and are offered in a range of heights and widths.

Each 30mm screen has an integral accessory rail for shelving, counter tops, stationery sets, pen holder and desk tidy.

Freestyle screens have been designed to offer a comprehensive range of features and benefits while quality engineering ensures a cost effective solution.

Key features of the range include:

- Unique clip system providing simple and quick method of linking screens which assists installation or reconfiguration
- Full aluminium frame encapsulating a lightweight composite board
- Integral accessory rail
- Variable panel finishes with mix and match options
- Stackable modular panels including a dedicated 200mm high cable access panel
- Optional extras include shelves, counter tops and acrylic headers
- Desk mounted and freestanding screens can be connected together
- Stabilising feet are available if screens are to freestand
- Desk/storage mounted clamps suitable for 25mm thick tops are available which overcome any interference at floor level

Freestyle screens are designed to provide for maximum freedom of expression within the open plan office through their flexibility and adaptability. They are constructed of finely detailed aluminium with various sizes and types of infill panels.

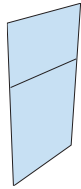

Freestyle screens provide openness and lightness for selective privacy and they also offer a facility for vertical workstation storage. The screens can be simply attached to desk tops or can be freestanding. Freestyle screens can be interconnected in two, three or four way configurations and are complementary to all Senator's 25mm desk programmes featured in this guide.

Freestyle screens can be used to enhance the individual workstation or the complete open plan office. They can be used to support the work process through their use of vertical space for shelves, tool bars and other accessories as illustrated in the main image.
