

# universal storage

functional, flexible and  
space efficient

Senator's range of storage products are designed to complement and to be compatible with the various Senator ranges.

They provide a facility for the storage and retrieval of the most commonly used types of filing high frequency, general bulk or archival; and with the variety of internal accessories available they can be organised for multimedia storage.

Many of the storage units can be used as room dividers or for territorial definition. The differing heights of units also provide an opportunity for landscaping in the open plan office.
